Foundational Concepts for the Urban Forest Program in Halifax

- Management
- Adaptive management
- Values
- Citizen engagement
- Professional collaboration
- Words and numbers
- Silviculture and arboriculture
- Humility

Foundational Concepts: Values

- Value = what people say is important to them
 - "I value trees in the city because . . ."
- Methods:
 - Interception surveys on the street
 - Field tours with focus groups
 - Online surveys
 - Photo elicitation
- Locations: Calgary, Winnipeg, Fredericton, Halifax

Top seven value categories from interception surveys

Halifax	Fredericton	Winnipeg
Aesthetics	Aesthetics	Aesthetics
Air	Air	Shade
Oxygen	Shade	Naturalness
Sense of Place	Oxygen	Environ Quality
Environ Quality	Biodiversity	Air
Naturalness	Environ Quality	Oxygen
Shade	Wellbeing	Sense of Place

Why/how do we value city trees?

- Beautify the city
- Conserve fuel
- Prolong life of streets
- Reduce energy costs
- Enhance safety
- Provide shade
- Business opportunities
- Draw tourists
- Diverse foods
- Foster health
- Recreation opportunities

- Carbon capture & storage
- Cool the city
- Slow down stormwater
- Clean the air
- Improve water quality
- Conserve biodiversity
- Employment
- Increase property values
- Learning opportunities
- Sense of place
- Sense of well-being

Our publication for lay people . . .

In Support of Trees in the City

A Message for Municipal Councillors, Urban Developers and NGOs

Prepared by Canadian Urban Forest Research Group March 2013

Urban forest

For our purposes here, we define the urban forest to include all the trees in the city. While a tree is a large woodystemmed plant (or one that can grow large), a forest is a treedominated ecosystem. That means that a forest includes all the other kinds of organisms (that is, plants, animals, microbes, etc.) that are associated with trees, plus the soil, air and water upon which the living community depends. We use the terms "urban forest" and "trees in the city" interchangeably.

Why are trees in the city important?

Why have we prepared this document?

We believe that trees in the city do not get the attention they deserve. Considering the abundant values associated with the urban forest, too little effort goes into learning about them, expanding them, tending them, appreciating them, and generally being good stewards. Our aims with this short document are threefold - to remind policy people why urban forests are so important to city dwellers, to encourage further learning about urban-forest values, and to promote stronger attention to urban forests through increased stewardship activities

https://sylveritas.files.wordpress.com/2014/03/cufrg 2013 supporttreesinthecity.pdf

Whose values matter?

Foundational Concepts: Professional Collaboration

Foundational Concepts: Words and Numbers

The world is way bigger, way more than mere quantities!

"You can't manage what you can't measure!"

 OK, but words form the nominal scale of measurement – gotcha!

Foundational Concepts: Silviculture and Arboriculture

- Arboriculture = practice and study of the care of trees...(ISA)
- Silviculture = study and practice of the maintenance and growth of **forests** (ISA)

· Unit of care: tree vs. stand vs. forest

Foundational Concepts:

Humility

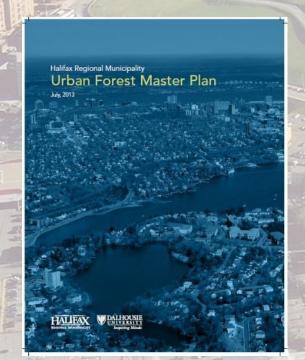

Mutual Learning

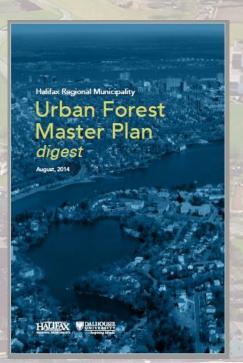

The HRM Urban Forest Master Plan

- Preceded by UFORE and Stratum analyses in 2007
- Agreement to engage HRM and Dalhousie Univ. in 2010 (annual contractual arrangement to hire students)
- Spring 2010 to Sep 2012 intense period of analysis, literature review, writing, and consultation
- Team:
 - · HRM:
 - John Charles, planner
 - John Simmons, arborist and urban forester
 - Dalhousie:
 - Peter Duinker, professor
 - Rotating group of a dozen students and former students

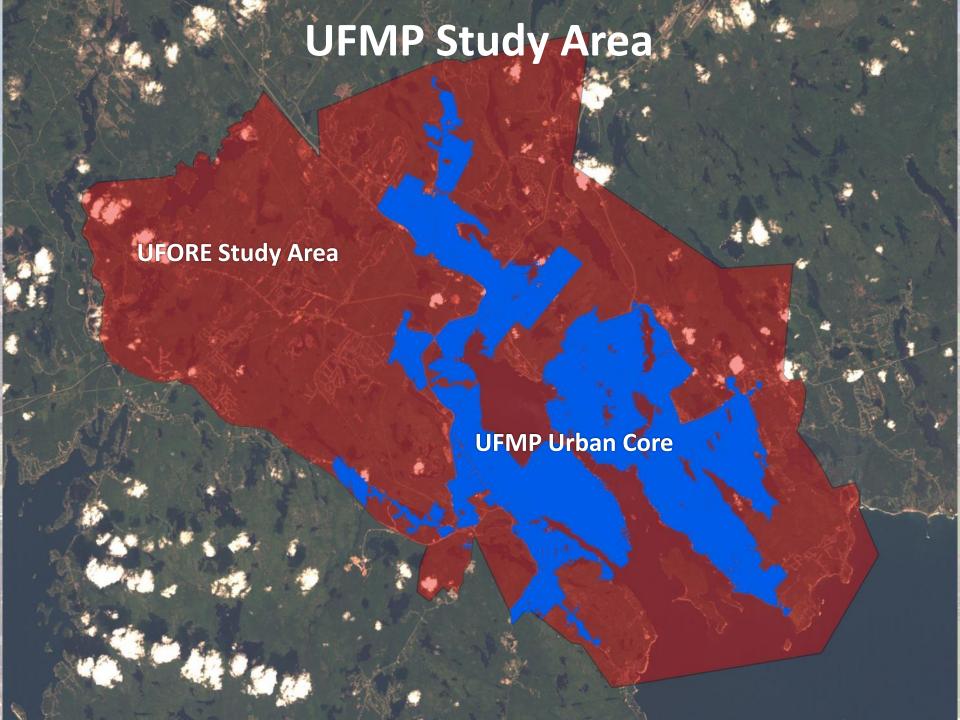

The HRM Urban Forest Master Plan

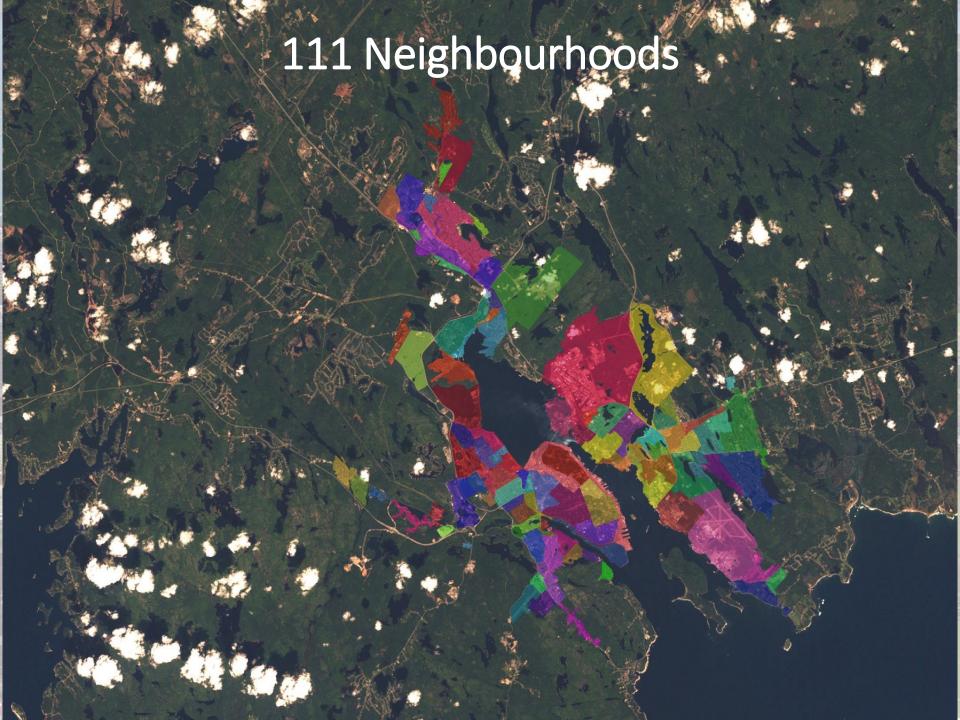

- Draft approved by HRM Council September 2012
- Revised version published July 2013 (440 pp.)
- Digest version published August 2014 (42 pp.)
 - Go to: https://www.halifax.ca/property/UFMP/

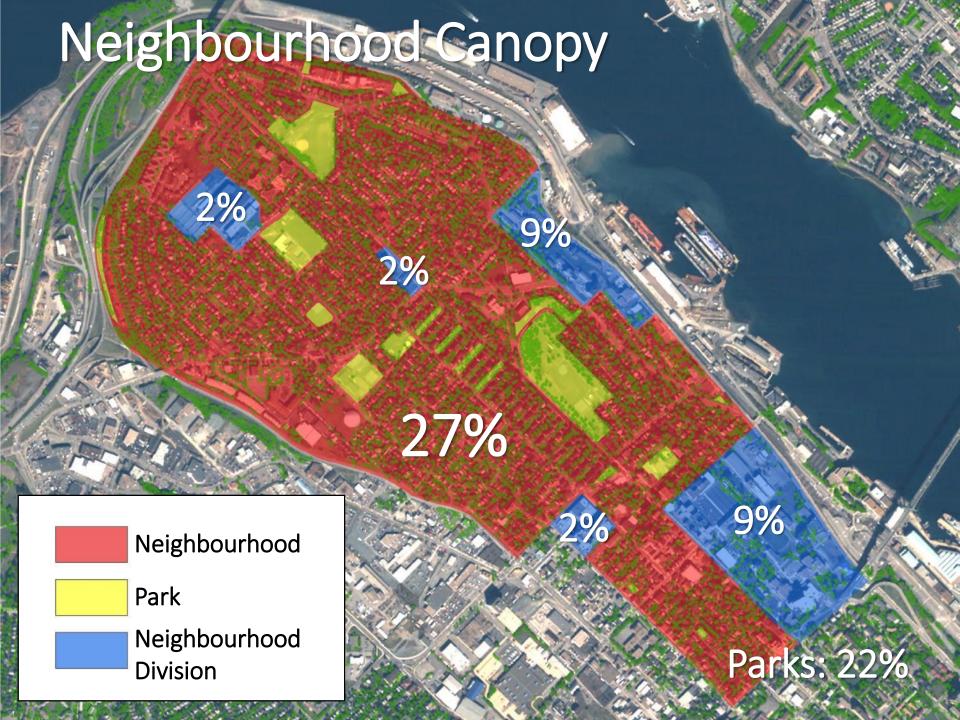

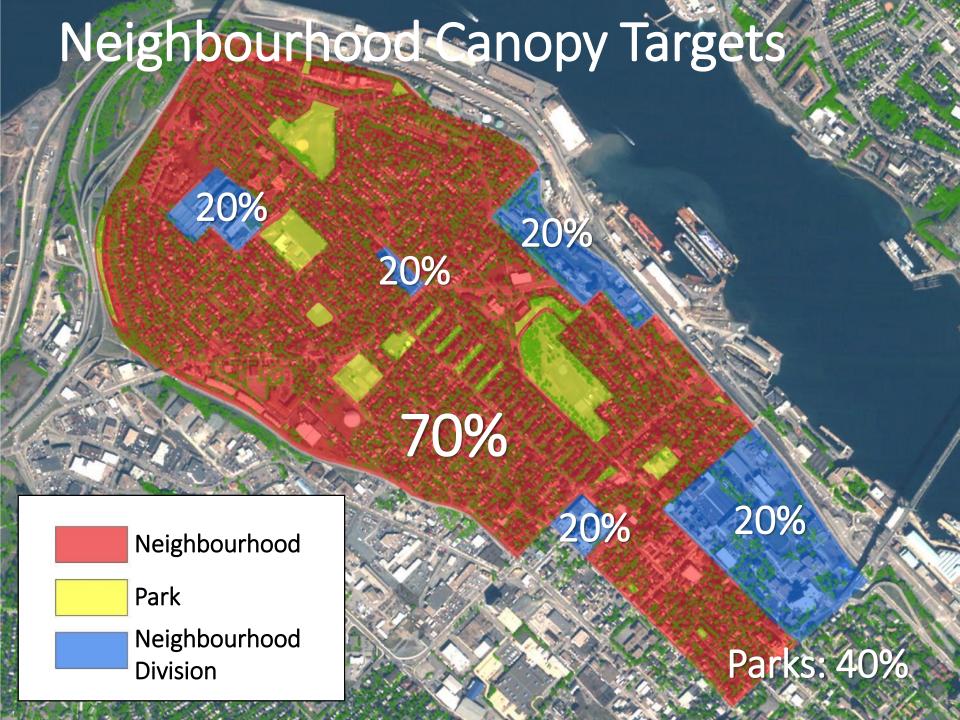

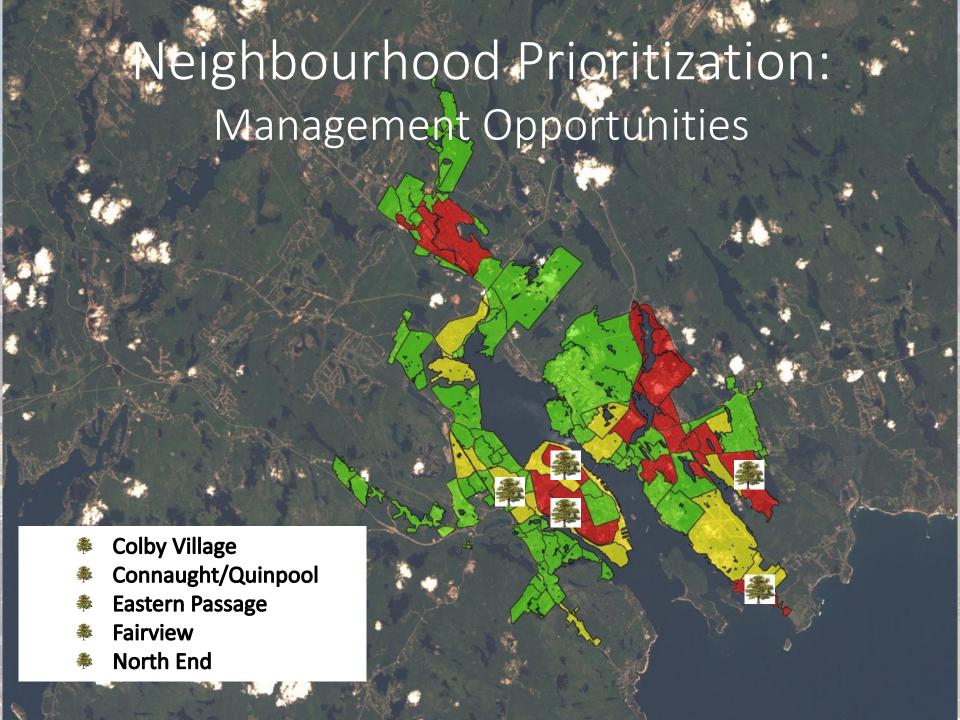

Action priorities

- Physical
 - Plant trees (streets and parks)
 - Prune trees
 - Priority neighbourhoods
- Regulatory
 - Tree bylaw?
 - Tree specs and standards: for developers
 - Improve contracting relationships
- Public Engagement
 - Education
 - Consultation
 - Tree-planting
- And . . .

Research, monitoring, and support: a role for Dalhousie

- Annual contract of about \$35K to hire two graduatelevel interns for May-Aug
- 2013-2016 monitor various activities and results
 - Planting
 - 2016 mechanical damage survey (grass maintenance)
 - Various student project reports
 - Lit research and writing
 - Assist warranty inspections

Accomplishments, 2013-2016

- Street-Tree Planting
 - Contract about 5K trees
 - Hfx Urban Forestry about 1K trees
 - Developers and roadway re-construction no idea!
 - Tree list diverse and biased toward native and Carolinian
- Street-Tree Pruning
 - Long-term desire: cyclical, ten years or less
 - Got two seasons done winters 2014 and 2015
 - Many discussions but no deals with NS Power

Accomplishments, 2013-2016

- Regulation
 - Student-based studies done
 - 2016 tree specs and standards document being developed
 - Likely not proceeding with a private tree-cutting bylaw
- Citizen engagement
 - Walkabouts
 - Radio and TV spots/interviews; lots of PSAs
 - Newspaper items (e.g., PD op.ed. on tree damage)
 - Door hangers during planting
 - Special workshops (e.g. urban orchards)
 - Social media
 - Special citizen-based tree plantings

Joys

 Plan contains explicit commitment by HRM to spend money at Dal on research and monitoring

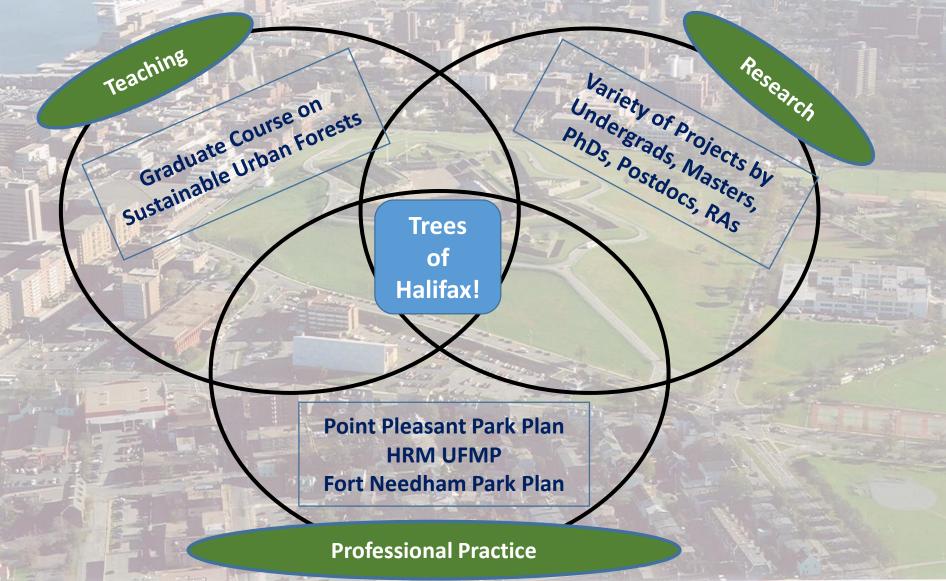

Joys

- Seeing a plan get implemented
- My planning experience as author:
 - Raith Woodlot, near Thunder Bay (1990; not implemented)
 - Millar Western DFMP, Whitecourt (2000; unsure of implementation)
 - Point Pleasant Park Plan (2008; partial implementation)
 - Victoria Park Plan, Charlottetown (2013; not implemented)
 - Upton Farm Plan, Charlottetown (2014; not implemented)
 - Fort Needham Park Plan, Halifax (2015; not implemented)
 - HRM UFMP (2013; partial implementation)
- If there is no implementation of a plan, there is no management!!
- Flipside sorrow when not implemented

Joys

Integration of teaching, research, professional practice

Tribulations . . .

prospect of discontinuity of personnel

Tribulations . . .

 tree abuse - bad planting, bad maintenance, bad pruning

- contract issues, esp. for planting
 - Low bid always wins
 - Substitutions
 - Quality control
 - Warranty
 - Transportation problems
 - Planting out of season
 - Information management

 Subdivision development that continues to see trees as minor afterthoughts

• - inability to reach more of the citizenry

precariousness of the budget (annual appropriations; always subject to clawback)

 watching administration proliferate (e.g. steps in getting a contract set up)

 witnessing administrative structural instability (e.g. frequent re-orgs)

- Struggles with data and information management
 - GIS registration of trees
 - Data on tree size and condition
 - Basic information on street-tree plantings
 - Contract
 - HRM Urban Forestry
 - HRM infrastructure renewal
 - Subdivisions and new developments

- To urban forest managers
 - Hone your people and political skills
 - Make it easy for people to adopt YOUR agenda
 - Support life-long learning
 - Embrace scholarly community
 - Have your OWN hands on the tiller of UF planning

- To professors
 - Get out of the ivory tower
 - Facilitate and collaborate
 - OK to bring theory to practice, but be sure to know practice
 - Help the poor souls who labour in the city trenches

- To students
 - Make your profs help you get strong practical experiences and take you to conferences [©]
 - Bounce constantly between theory and practice
 - Get good grades

- To councillors
 - Become the tree advocates at Council
 - Support your urban-forest team
 - Spend your discretionary funds on trees, not playground equipment

- To everybody
 - Look up while walking the streets

- To everybody
 - Ask yourself this: wherever a tree COULD grow, but isn't, why, and what would it take to get a tree there?

- To everybody
 - Challenge conventional wisdoms/follies:
 - Why are they planted far apart instead of close together?

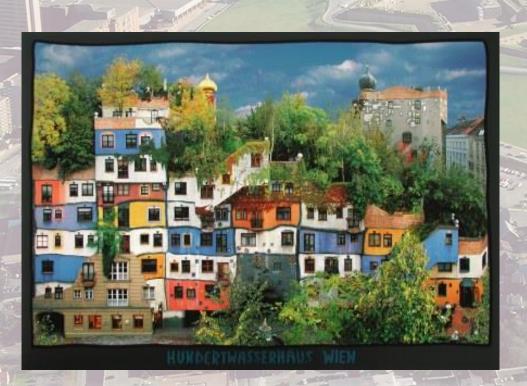

- To everybody
 - Challenge conventional wisdoms/follies:
 - Why are trees planted in straight lines, and not randomly or at least in curves?

- To everybody
 - Challenge conventional wisdoms/follies:
 - Why are trees pollarded?

- To everybody
 - Challenge conventional wisdoms/follies:
 - Why don't we plant more trees on buildings?

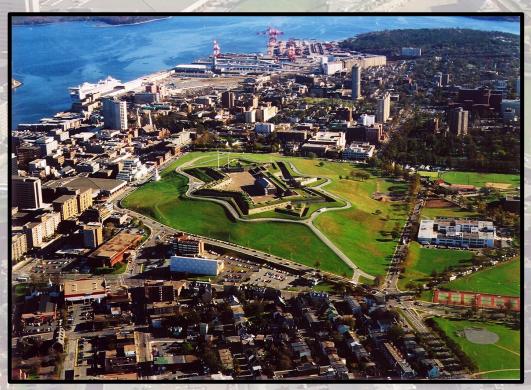

- To everybody
 - Challenge conventional wisdoms/follies:
 - Why aren't commercial developers required to shade their parking lots with trees?

Implementing Halifax's Urban Forest Master Plan: Joys and Triumphs, Trials and Tribulations
