

2015 & 2016 planting sites and details

Regions	Locations	Species	Environmental Impact
Atlantic	Sackville, NB	Mix of species representing the native Acadian Forest	Rehabilitation of the watershed and wildlife corridors by planting trees on abandoned farmlands.
Quebec	Otter Lake and Mansfield	Red pine	Strong winds in 2013 caused much blow down of trees on these sites. The trees will be planted for erosion mitigation, improvement of fish and wildlife habitat
Ontario	Sudbury	Variety of species such as Hemlock, Ironwood, Yellow birch	Rehabilitation of sites due to past mining practices
Prairies	Town of Rivers, MB	White spruce	Prevention of soil erosion and protecting watercourse quality
British Columbia	100 Mile House	Douglas fir, spruce, Lodgepole pine	Re-establish forest cover after Mountain Pine Beetle epidemic to provide wildlife habitat, moisture retention for soil and recreational opportunities
