

Taking Action:

Canadian Urban Forest Network

Canadian Urban Forest Network (CUFN)

The CUFN was created in 2004 and is the largest network of urban forestry experts, academics and practitioners in the country. (900+ members)

Organized by Tree Canada, the CUFN advocates for urban forests all across Canada under the guidance and leadership of the CUFN steering committee.

The CUFN seeks to:

1. build value by helping and empowering those who practice urban forestry;
2. bring together those who are interested in urban forestry;
3. facilitate the exchange of information about urban forestry in Canada; and
4. increase awareness about the urgent issues facing Canada's urban forests.

Canadian Urban Forest Network (CUFN)

Three primary tasks undertaken by the CUFN to achieve their mandate:

1. Update the Canadian Urban Forest Strategy
2. Help deliver and promote the Canadian Urban Forest Conference
3. Grow the Canadian Urban Forest Network

CUFN – Pacific Region

Since 2016 CUFN Pacific has had a Pacific Region Steering Committee in place.

The goal is to move forward the mandate of the CUFN in BC in a way that is specific to the needs of the region.

Steering Committee membership currently includes:

- Municipalities
- Professional Associations
- Academia
- Consultants
- NGOs

CUFN – Pacific Region

CUFN Pacific Region deliverables to date:

1. 2015 Pacific Region Workshop
2. 2017 Pacific Region Workshop
3. 2019 Pacific Region Workshop - **You are here!**
4. 3 Year Action Plan
5. Part Time Regional Coordinator

CUFN – Pacific Region

Objectives

- Grow a vibrant, active, and broad network that provides resources, guidance, events and shared community
- Connect the various players in field of urban forestry and related disciplines
- Serve as a hub for information dissemination, research linkages and extension
- Create and increase awareness of the profession of urban forestry

Discussion Questions

- With these objectives in mind, what could this type of network provide for you in your urban forestry work? Please be as specific as possible.
- What are some of the key challenges that you encounter in your urban forestry work?
